# AquaLIGHT 106 C

Bright and Effective Light in Every Space

Our well-proven lights are fitted with energy–efficient LED plates that produce effective illumination. AquaLIGHT 106 C offers a single light option with white variants (wW, W, cW). This powerful light brings even more brightness to darkness and can also be installed in larger fountain systems. Individual fountains and water effects are effectively illuminated with lights like these. Additionally, these vibrant colors show their full potential when combined with the AquaVARIO and AquaSWITCH systems. They create an efficient composition in open space fountains.

Lighting Angle:

| 60° | 10° |

! In lighting, choosing the lens angle is as important as selecting the color or wattage. Small angles retain brightness at long distances, while wide angles cover larger areas but lose brightness over distance.
