AquaTUBE
Tubular Water Magic

AquaTUBE delivers the delight of an animated pool experience without the need for a direct water connection. The bucket design accommodates its own water capacity, and each unit includes an individual 24 VDC submersible pump. With a plexiglass structure, it effectively dampens the noise from high water levels used in animations, ensuring a quiet environment. Additionally, the system operates entirely in a dry atmosphere.

AquaTUBE Triple Wooden Set
Wooden Type

AquaTUBE offers the delight of an animated pool experience without requiring a water connection. Its bucket design includes a built-in water reservoir, with each unit featuring an individual 24 VDC submersible pump. This unique setup ensures independent operation without an external water source, making it ideal for indoor settings.

The plexiglass construction dampens the noise generated by high water levels during animations, ensuring a quiet environment. The dynamic and captivating water effects create a mesmerizing visual experience. The system's self-contained nature also makes it easy to maintain, with minimal water loss and reduced need for frequent refills.
