

# AquaSTAR

## The Shining Star of Fountain

AquaSTAR is a mounted unit connected to a collector, designed to create captivating water displays. It offers lighting options such as 1 X AquaLIGHT C for added visual appeal. A single pump supplies water to the collector, while a solenoid valve under each nozzle controls the flow. By aligning nozzles in a line, you can achieve beautiful sequential running effects.

Specifically designed for multiple nozzles arranged in a line, AquaSTAR creates the RUN effect with water, which is essential for dynamic and rapid effects in shows aimed at impressing audiences. When the DMX-controlled solenoid is combined with integrated lighting, the viewing experience is significantly enhanced, doubling the pleasure.

- ✓ Robust Stainless Steel Body
- ✓ 24VDC Powered & DMX-RDM Controlled
- ✓ IP68 Socket One Cable Connection
- ✓ Synchronorm Dependence Library available
- ✓ Different Nozzle Types
- ✓ AquaLIGHT -C x1 & AquaLIGHT x2 (Options)
- ✓ IP 68, 24VDC Solenoid Valve ON/OFF System

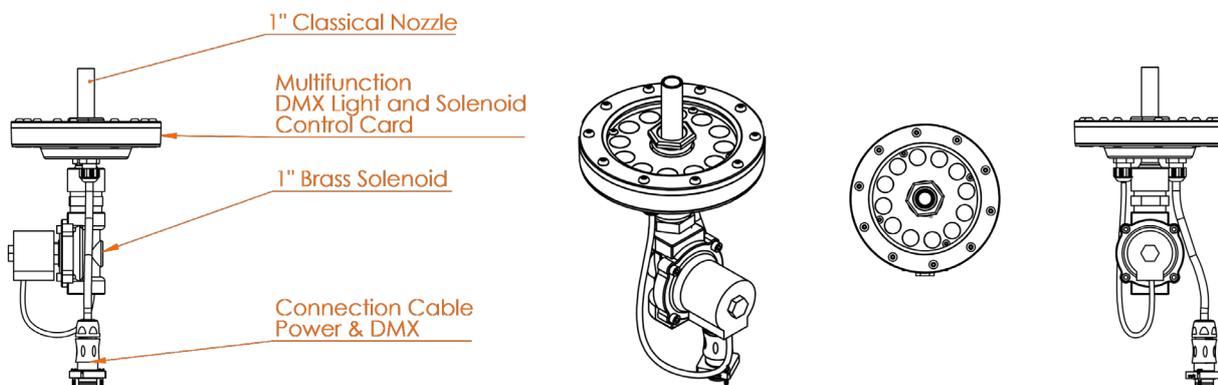

## TECHNICAL DETAILS

MODEL :	AquaSTAR
DIMENSION (LxMxH) :	160x160x265 mm
MATERIAL :	Stainless Steel
WEIGHT :	1 kg
POWER & DMX :	Combo Cable
MAX PRESSURE :	2 Bar
CURRENT :	1 A
POWER :	24 W
VOLTAGE :	24 VDC
PRODUCT NO :	1020

## COMPATIBLE ELEMENTS AND ACCESSORIES

PRODUCT GROUP	SEE
Nozzles :	Accessory nozzles
Connection :	Connection accessories
Controlling :	Control accessories
Holder and Stand :	Holder and Stand Accs.
Lighting :	Lighting Series
