

SHOW CONTROL

DMX-Digout PRODUCT NO : 5235

DMX-Digout is a type of rail-hanging component. It has power and data inputs and can control up to 8 units. There are two modes: PWM and Switch. The Switch mode is simply an on-off mode. However, PWM (Pulse Width Modulation) controls the pulse width based on modulator signal information, allowing for more flexible system operation.

- ✓ POWER IN : 24 VDC
- ✓ DMX CH : 8
- ✓ OUT PUT : 8 NPN TR-OUT, 1A EACH OUTPUT
