

About our Sub-Pumps;

- Multistage 6'-8'-10' submersible pump in tie strap version for vertical or horizontal installation.
- Hydraulics, Motor and Jacket fully assembled delivery
- All parts that come in contact with the fluid are made of corrosion-free materials.
- Three-phase motor for direct or star-delta start.
- The maximum inlet pressure is 10 bar.

Cautions

- The water should be separated from long-fibre and abrasive constituents
- The unit must be fully immersed in water during operation.
- No suction mode is possible with these units

Consumption Schematic
